Note

We hope you will find this listing of art therapy outcome and single subject studies useful for purposes of research, grant writing, demonstrating support for your art therapy program, and as evidence of the effects of art therapy with various client populations. Listings are grouped primarily by client populations

Links to the abstracts or articles are provided for some articles. The AATA Research Committee plans to update this listing annually. We welcome input from art therapists who become aware of studies that we may have missed. Please direct any corrections or additions to: info@arttherapy.org.
